TECHNICAL INFORMATION ergo.® 7420

consists out of resin ergo.® 7418 and hardener ergo.® 7419

Base: two-component-epoxy-resin

Curing: at room temperature.

accelerating possible by temperature increase

Application: Universal product with high strength properties and good adhesion to metals,

ceramic, glass, rubber, hard plastics and a wide range of other common

materials.

Use : Both components must be mixed in advance. The best mixture ratio is 1:1

Using the double-cartridge system with static mixture tube is very easy and avoids failures. The surfaces must be clean, which means, dry and free of dust and grease. For this reason it is recommended to use either the ergo.® Cleaner

9190 (for metal) or the ergo.® Cleaner 9195 (for plastics)

Mixture ratio resin: hardener, by weight 100:80

resin: hardener, by volume 1:1

Colour resin, hardener colourless, slightly yellow

Viscosity of the mixed product 40 – 45 Pa•s
