

Product Update

Metcal MX-5000 Series Advanced and UltraFine Hand-piece Grip/Sleeve Modification

The Metcal Advanced and Ultrafine hand-pieces for the MX-5000 Series Soldering System is shipped with three interchangeable grips, each with a different pattern (ring, scallop or knob). Each grip is a different pattern to meet operator preferences for comfort and feel. Originally these grips were all black in color, and a green grip was available as an option. We will now ship the ring and scallop pattern in black, and the knob pattern grip will only be available in green.

The green knob pattern grip is useful when there is a need to differentiate between lead and lead-free processes.

Below is the corrected Hand-piece and Grip table for the MX-5000:

MX-5000 Hand-pieces and Grips
