

ROC Reflow Oven Cleaner

ROC is a specially formulated micro-emulsion for cleaning reflow ovens and wave solder machines and is designed to remove all types of flux residues. It aids quick and efficient machine maintenance. The cleaner is also suitable for many general degreasing applications.

- Micro-emulsion cleaner for removal of flux residues; ideal for maintaining reflow ovens
- Non-flammable cleaner; can be applied whilst the equipment is still warm
- Non-corrosive; contains corrosion inhibitors for ferrous and non-ferrous metals
- Can be used as a general degreaser; compatible with most plastics

Approvals **RoHS-2 Compliant (2011/65/EU):** **Yes**

Typical Properties

Form	Liquid
Colour	Colourless
Density @ 20°C (g/ml)	1.002
Flash Point (°C)	None
pH	11-12

<u>Description</u>	<u>Packaging</u>	<u>Order Code</u>	<u>Shelf Life</u>
Reflow Oven Cleaner	500ml Trigger Spray 25 litre bulk	ROC500ML ROC25L	72 months 72 months

Directions for Use

ROC is supplied at a ready-to-use concentration in a spray trigger bottle for easy application; it can be used at temperatures between 20-50 °C. The performance of the cleaner will be optimised by spraying onto a warm oven, ~40°C, and leaving for a few minutes to soften the residues before manually wiping off. As the product is non-flammable the oven can be switched back on immediately after cleaning without concern about solvent vapours reaching their flash point.

Storage

The product should be stored below 40°C in the original container. Do not freeze.
